

# EDCH Revenue Assurance

## RED ALERT

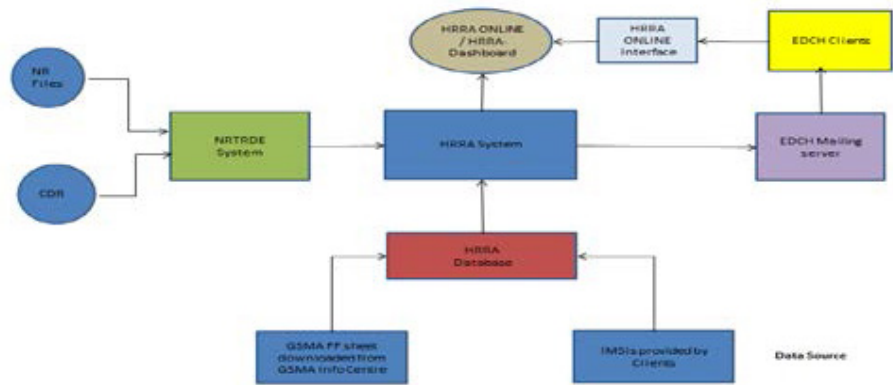

One of the most critical Fraud Types is the international revenue share Fraud (IRSF) and (PBX hacking), that's why FF decided to share with its members HOT B numbers and High risk ranges which were used in such type of fraud so that telecom opco's protect their revenues from similar potential Fraud hits

### RED ALERT

EDCH is going to introduce a new solution for Roaming Fraud that assist Telecom operators in detecting, monitoring and investigating usage to Hot B numbers or high Risk Ranges with the ability to blacklist IMSI's in order to protect their revenue.

By analysing the In-bound & Out-bound NRT traffic through NRTRDE service, EDCH will alert the NRTRDE clients in near real time for any usage to Hot B numbers or High risk range & blacklisted IMSI's.

RED ALERT service will be a web interface tool across EDCH Online where reports and Dashboard as well will be available.

### Implementation

To avail this service, operators should **contact their EDCH Account Manager** to make arrangements for implementation.

#### Requirements:

- Subscription in EDCH NRTRDE service

### Support

EDCH has a support team of dedicated and highly-qualified professionals that is ready to assist you on any concerns

### Related Services

**EDCH Online** – providing real time access to operators' roaming business data.

**NRTRDE**- Near Real Time Roaming Data Exchange is a GSM procedure that requires operators to exchange roaming records in near real time to prevent fraud.

### Conclusion

Client will have the up-to-date HOT B Numbers and High Risk ranges with the option of building their centralized blacklist IMSIs.
