

EDCH Revenue Assurance

SIM Watch

As the number of test SIM cards entrusted to you increases with each new roaming agreement, so does the need for careful monitoring of their usage. Some operators however, use inflexible and mediocre means of cataloguing their test SIM cards, allowing for their misuse. A test SIM card may be quietly misused for some time until a large bill is received from your roaming partner.

SIM Watch

SIM Watch is a Web-based application which allows operators to catalogue and monitor all test SIM cards sent to and received from their roaming partners. Alerts can be sent by email whenever a SIM card's usage exceeds the monthly threshold, or when a SIM card is used outside of its intended network.

Implementation

Access to SIM Watch is provided to clients of EDCH's Data Clearing service, via an email to the Account Manager. 1 day is usually required for service setup.

Support

EDCH has a support team of dedicated and highly-qualified professionals that is ready to assist you on any concerns regarding SIM Watch.

Related Services

EDCH Online- The EDCH Online reporting website provides real time access to operators' roaming business data. Operators can leverage EDCH Online to gain detailed insights on their roaming business, minimise revenue loss and maximise business opportunities.

Conclusion

SIM Watch provides a convenient way to catalogue and monitor all your test SIM cards. It empowers you to perform regular tests on your roaming services with the assurance that you will be notified if and when the usage crosses the agreed monthly threshold.
